Scott,

Here are our revised plans. We discussed the comments with the traffic staff and have addressed them accordingly. Our responses to the comments are listed below. Please let me know if you need anything else from us.

Comment 1: R10-12a should be placed to the left of the corresponding signal head.

**Response: We would prefer to keep the R10-12a signs as shown on the plans to keep the mast arm lengths short. This was discussed with city traffic staff, and they agreed with our approach.**

Comment 2: Where is pull box 5 connecting to? Only the connection to the cabinet is shown and not the interconnection to the existing system.

**Response: There is existing fiber along the north side of Colbern Road that the signal will be interconnected to. We added linework showing the existing fiber to the signal plan sheet.**

Comment 3: Need Pedestrian Push Button signs. Not shown in quantities.

**Response: The Signs table on sheet 6 has been revised to include a line item for R10-3E signs.**

Comment 4: Video Detection should be Iteris NEXT system.

**Response: The video detection system in the Controller and Equipment table on sheet 6 has been revised to specify an Iteris Next Video Detection System.**

Thanks,

**Jeff Wilke, PE, PTOE** (KS, MO, FL, NE)

You don't often get email from [scott.ready@cityofls.net](mailto:scott.ready@cityofls.net). [Learn why this is important](#)

Matt - thank you, and have a good week off.

Jeff - don't hesitate to reach out, glad to assist as needed.

Jeff  
I will be out of town next week so once you get the revisions made please get with Scott or Mike and get them uploaded

Thanks for the help

*Matthew J. Schlicht*
